TITLE	South Carolina Commission on Higher Education. Annual Report.
INSTITUTION	South Carolina Commission on Higher Education, Columbia.
PUB DATE	Jan 78
NOTE	107p.
AVAILABLE FROM	South Carolina Commission on Higher Education, 1429 Senate Street, Columbia, South Carolina 29201
EDRS PRICE	MF-$0.83 HC-$6.01 Plus Postage.
DESCRIPTORS	Accreditation (Institutions); *Annual Reports; Budgeting; Degrees (Titles); Enrollment Rate; *Federal Aid; Graduate Study; Health Education; Higher Education; Management Information Systems; Medical Education; Private Colleges; *State Aid; State Boards of Education; *Statewide Planning; *Statistical Data; *Student Financial Aid; Student Teacher Ratio; Teacher Salaries

ABSTRACT

The activities of the South Carolina Commission on Higher Education for fiscal year 1977 are outlined. The areas reported on are: (1) federally funded programs; (2) activities of the South Carolina Postsecondary Education Planning Commission; (3) new programs approved; (4) review of graduate programs; (5) activities in medical and health education; (6) licensing non-public institutions; (7) student financial assistance programs; (8) higher education management information system; (9) activities of the Computer Advisory Committee; (10) state appropriations for colleges and universities; and (11) capital improvements. A summary of the Commission's expenditures for 1976-77 and a list of publications issued by the Commission are provided. Appendices include statistics on the number of degrees awarded, enrollments, student/faculty data comparisons, and average salaries of faculty. (SPG)

TO: *His Excellency, Governor James B. Edwards, and the Members of the South Carolina General Assembly*

On behalf of the South Carolina Commission on Higher Education, I have the honor to transmit herewith its Annual Report, which outlines the activities of the Commission and its staff during the past year. The Commission appreciates the support and cooperation which it has received from all the agencies of State Government, and looks forward to the continuation of our mutual efforts to improve the quality of post-secondary education in South Carolina.

Respectfully yours,

Howard R. Boozer

INTRODUCTION

The South Carolina Commission on Higher Education, established by Act Number 194 of the General Assembly in 1967, was created as the agency of State Government specializing in higher education.

The Commission's primary concern is the strengthening of all the State's institutions of higher learning, to the end that quality education and training beyond high school may be available to every citizen who desires it and can be expected to profit from it. It is a coordinating body which must rely primarily on logical persuasion to gain cooperation and support.

The functions of the Commission are determined by the General Assembly and include the following:

1. *To make studies* regarding roles, operations, structure and external relations of South Carolina institutions of higher education.

2. *To submit recommendations* as may be desirable to the Budget and Control Board and General Assembly regarding policies, programs, curricula, facilities, administration and financing of the State-supported institutions of higher education.

3. *To receive and review the annual appropriation requests* of the State-supported institutions of higher education and submit recommendations to the Budget and Control Board and the General Assembly. Capital budgets also are reviewed by the Commission.

4. *To approve new programs* before they are undertaken by any State-supported institution of higher education unless approved by the General Assembly.

5. *To administer certain federal programs* authorized by the Higher Education Act of 1965, as amended, including Community Service and Continuing Education under Title I, Equipment for Undergraduate Instruction under Title VI, and Construction of Undergraduate Facilities under Title VII.

The activities outlined in this report are major, complex, and time consuming in nature, administered by a staff which is small in comparison to other states. In addition to the major functions mentioned above, the Commission staff answers inquiries from the State and nation on our institutions of higher learning, provides brief reports on higher education for members of the General Assembly and the Governor, and cooperates with other national and regional higher education agencies.

CHANGES IN COMMISSION MEMBERSHIP

In July, 1977, Governor Edwards appointed Mrs. Nancy D. Hawk to succeed Mr. Gedney M. Howe, Jr., and reappointed Mr. T. Emmet

Walsh to a fourth term on the Commission. During the same month, Mr. M. Calhoun Colvin submitted his resignation to accept a position on the South Carolina Forestry Commission.

FEDERALLY FUNDED PROGRAMS

The Commission on Higher Education administers certain federal programs authorized by the Higher Education Act of 1965, as amended, including the Community Service and Continuing Education Program (Title I), the Undergraduate Instructional Equipment Program (Title VI-A), and the Construction of Undergraduate Academic Facilities Program (Title VII-A). Each of the programs is administered as a State operation under State Plans adopted by the Commission on Higher Education and approved by the U. S. Commissioner of Education. Details concerning these programs for Fiscal Year 1977 follow:

Community Service and Continuing Education (Title I)

The purpose of this grant program is to make use of the expertise and facilities of higher education in programs of continuing education and community service designed to assist in the solution of community problems. The "seed money" provided under this Act serves to strengthen the capacity and interest of universities, colleges, and technical institutions in the conduct of community service programs. During Fiscal Year 1977, the State of South Carolina was allotted $197,085 under Title I. With these funds, less administrative costs of $25,000,[1] seven community service and continuing education projects were funded. The funding schedule for FY 1977 was as follows:

University of South Carolina	Workshop on Methods, Procedures and Utilization of *Evaluation*	$10,763
University of South Carolina	Information Systems in Local Governments: Management Strategies and Technical Assistance for Obtaining Low-Cost Data Processing Services.	35,972
University of South Carolina	Community Education on *Child Abuse and Neglect*	20,131
University of South Carolina	School for South Carolina *Assessing Officials*	24,559
Winthrop College	Improving Government Efficiency through *Management Training*	19,386
Medical University of South Carolina	A Partnership Approach to Consumer Education in *Health Care Planning*	37,337

Medical University of South Carolina	*Community Health Planning* for Chesterfield and Orangeburg Counties	22,500
Available funds for application to contingency needs of current project(s).		1,377
	TOTAL	$172,065
Administration		25,000[1]
	GRAND TOTAL	$197,065

[1] Normally, the cost of administration falls below the budgeted $25,000 and available funds are applied to projects, if needed, or are returned to the U. S. Treasury.

Undergraduate Instructional Equipment (Title VI-A)

The purpose of this grant program is to improve the quality of undergraduate instruction in postsecondary institutions by providing financial assistance on a matching basis for the acquisition of undergraduate instructional equipment and materials and for related minor remodeling.

Grants may be made to accredited public and non-public postsecondary institutions, including vocational schools, as well as combinations of such institutions. To be eligible, an institution must offer not less than a one-year program of training to prepare students for gainful employment in a recognized occupation. A school or department of divinity is not eligible.

Grants are awarded under two categories. Category-I provides grants for the purchase of laboratory and other special instructional equipment and materials; Category-II provides grants for the purchase of equipment and materials for closed-circuit instructional television.

Fiscal year 1977 funds allocated to South Carolina under the program were as follows:

Total S. C. Allotment	Category-I	Category-II
$105,848	$84,678	$21,170

Eleven of the thirty-three institutions submitting applications under Category-I were awarded fiscal year 1977 funding, and three of the seventeen institutions submitting applications under Category-II were awarded funding. The following is a list of the projects funded.

FY 77 CATEGORY-I UNDERGRADUATE INSTRUCTIONAL EQUIPMENT GRANTS

	Institution	Grant Awards	Matching Funds	Total Project Budget
1.	Allen University	$ 6,071	$ 1,567	$ 7,638
2.	Benedict College	4,823	4,823	9,646
3.	Central Wesleyan College	5,866	4,134	10,000
4.	Claflin College	6,322	6,322	12,644
5.	Erskine College	9,461	9,462	18,923
6.	Francis Marion College	9,932	10,055	19,987
7.	Limestone College	7,500	7,500	15,000
8.	Morris College	10,000	2,564	12,564
9.	Piedmont Technical College	9,955	10,000	19,955
10.	Spartanburg Methodist College	4,748	1,187	5,935
11.	USC-Spartanburg	10,000	14,124	24,124
	Total	$84,678	$72,038	$156,716

FY 77 CATEGORY-II UNDERGRADUATE INSTRUCTIONAL EQUIPMENT GRANTS

	Institutions	Grant Awards	Matching Funds	Total Project Budget
1.	Allen University	$ 7,592	$ 3,358	$10,950
2.	Columbia College	3,709	11,160	14,869
3.	Trident Technical College (Palmer Campus)	9,869	9,869	19,738
	Total	$21,170	$24,387	$45,557

During the 12 years in which Congress has funded the Title VI-A program (1966-1977), South Carolina postsecondary institutions have submitted a total of 274 applications for Category-I and 77 for Category-II funding. A total of $2,583,362 has been requested under Category I and $ 30,542 under Category-II. Of these requests, 144 applications amounting to $1,178,707 were funded in Category-I and 23 applications amounting to $177,462 were funded in Category-II.

Undergraduate Academic Facilities Construction (Title VII-A)

The purpose of this grant program is to improve the quality of undergraduate instruction in postsecondary institutions by providing financial assistance on a matching basis for the construction of undergraduate academic facilities.

Allocations are made separately to states for the following two categories of projects: (1) projects proposed by public community colleges and public technical education institutions; and (2) projects pro-

posed by postsecondary educational institutions other than public community colleges and public technical education institutions. No funds have been appropriated for this program since fiscal year 1973.

The education Amendments of 1976 expand the Academic Facilities Construction Program by creating a new Part E to Title VII which authorizes grants and loans for reconstruction and renovation projects primarily designed to: (1) economize on the use of energy; (2) bring facilities into conformance with the Architectural Barriers Act of 1968 (making facilities accessible to the handicapped); and (3) bring facilities into conformance with health, safety, or environmental protection requirements mandated by Federal, State, or local laws.

If the new program created by Part E of Title VII becomes effective it is expected that all South Carolina applications for assistance will be filed initially with this Commission. Consequently, in addition to current responsibilities for administering the Title VII-A program, the Commission would function as a clearinghouse for applications submitted under Title VII-B (Grants Program for Construction of Graduate Academic Facilities); and Title VII-C (Loan Program for Construction of Academic Facilities).

Facilities Planning Projects

During the 1972-73 year, South Carolina was awarded a Federal grant to conduct a project designed to provide a facilities inventory system which might be helpful to postsecondary institutions in the State in assessing facilities requirements and in making space management decisions.

This project resulted in the development of a comprehensive facilities inventory system which meets the requirements of higher education inventory and classification procedures of the U. S. Office of Education. This system is being maintained by the Commission. The institutions under the jurisdiction of the State Board for Technical and Comprehensive Education and the private colleges and universities participated in the project and are presently on the system. Close coordination was maintained between this system and the facilities component of the Commission's Management Information System so as to eliminate duplication of effort and to insure that the two systems were compatible.

The facilities inventory system and the facilities component of the Management Information System have now evolved into an institutional and State level facilities information system which has been designed to provide:

1. Compilation of a maximum amount of facilities planning data;
2. Elimination of duplicative facilities data collections;

3. Completion of present State and Federal facilities reports at the State level;
4. Collection of minimal facilities data for updating purposes on an annual basis;
5. Expansion of compatibility with other postsecondary information systems;
6. Preparation of special facilities reports and report formats for institutional planning; and
7. Publication of a single facilities procedures manual, to be updated on a regular basis by the South Carolina Commission on Higher Education.

Facilities data from all postsecondary educational institutions in the State will be collected for the first time under the State-level facilities information system during the Fall of 1977.

S. C. POSTSECONDARY EDUCATION PLANNING COMMISSION ("1202" COMMISSION)

The South Carolina Commission on Higher Education, augmented to meet the requirements of Section 1202 of the Federal Higher Education Act of 1965 as amended, was designated by Executive Order of the Governor on July 23, 1974, as the South Carolina Postsecondary Education Planning Commission. The Governor's Executive Order provided that the Planning Commission would consist of the 17 members of the South Carolina Commission on Higher Education, augmented by three additional persons — the State Superintendent of Education, the Chairman of the Advisory Council of Private College Presidents, and a representative of proprietary education to be designated by the Governor. The Executive Order also designated the Chairman and the Executive Director of the Commission on Higher Education as Chairman and Executive Director, respectively, of the Planning Commission. Subsequently, Miss Francis Miller, President, Miller Aviation, Columbia, was appointed as the representative from the proprietary sector of education.

In June, 1975, the Planning Commission approved a list of proposed studies, and a tentative schedule, covering Statewide Goals; Institutional Missions; Enrollment Projections; Academic Affairs; Health Affairs; Student Affairs; Facilities Planning; Finance, Budgets and Computerization; and Special Studies. Study groups were established on a variety of subjects to obtain broad involvement in statewide planning from all levels of postsecondary education. The major studies and reports completed this past year are described below.

Goals. Based on the results of a survey of a cross-section of the State's citizens, the Commission reaffirmed its support of the goals established by the Commission on Higher Education in 1971 and published in *Goals for Higher Education to 1980 in South Carolina.*

Enrollment Projections. According to a study prepared by the Commission staff, with the assistance of consultants, enrollment in post-secondary institutions will continue to increase in South Carolina at least through 1985, although at a slower rate than was experienced in the past decade. Employing both "age ratio" and "cohort survival" techniques independently, the projections indicate that enrollments in senior colleges and universities will be 25 to 45 percent higher in 1985 than in 1976. Annual growth rates of 3 to 4 percent for the next several years are expected. A principal reason for this optimistic outlook is that South Carolina experienced a net in-migration of population in the period 1970-75, a trend that is expected to continue for the foreseeable future.

Library Study. An exhaustive study of library resources in the State has been completed and presented to the Commission by a team of consultants headed by Dr. E. G. Holley, Dean of the School of Library Science at the University of North Carolina, Chapel Hill. The study assesses strengths and weaknesses of libraries in all non-profit post-secondary institutions in South Carolina. Attention is also given to the role of the major public libraries in the State.

The study contains recommendations for action which have been adopted by the Commission. Although most academic libraries are judged to be adequate, priority attention will be addressed to upgrading the quantity and quality of holdings at three new senior branches of the University of South Carolina. An Advisory Committee on Libraries has been established to implement the consultants' recommendations on inter-library cooperation.

The Holley report is noteworthy in that the 1975 ALA Standards for collegiate libraries were employed for the first time in a Statewide study of this sort.

Community Colleges. The Advisory Council on Community Colleges has presented to the Commission its first report, the result of year-long deliberations of the Council. Focusing on access and on financing, the Council suggests that:

1) given the number and diversity of public two-year colleges, no additional institutions be created in the foreseeable future;
2) given the diversity of governance in postsecondary education, "one coordinating board with a Statewide perspective" be authorized to assign priorities for new State-funded construction on existing two- and four-year campuses;

3) formulae be developed allocating operating costs among students, local service areas, and the State;
4) tuition and fees be equalized for students attending technical education institutions and students attending two-year programs at regional campuses of the University of South Carolina;
5) remedial and developmental studies be confined primarily to two-year institutions, with senior colleges and universities generally admitting only those students who are prepared for traditional college level work; and that
6) guidance and counseling services be improved in two-year postsecondary institutions.

Student Tuition and Fees. The Southern Regional Education Board prepared for the Commission in May a study comparing tuition and required fees of South Carolina public colleges and universities with those of the other Southern states. The study revealed that such fees paid by full-time South Carolina students are higher than those in all but three other Southern states; fees charged to out-of-state students are somewhat above Southern regional medians.

Student Transfer. A Committee on Student Transfer has compiled and published *Policies of South Carolina Senior Colleges and Universities Concerning Transfer Students from Two-Year Colleges, 1977.* The publication contains data on inter-institutional migration of the over 7,000 students who transferred into South Carolina colleges, universities, university branches, and technical education institutions in the fall term of 1976.

In addressing these and approximately 16 other studies, the Planning Commission has attempted to involve, as appropriate, all sectors of postsecondary education, the General Assembly, and the public. It is the intent ultimately to produce a comprehensive plan for postsecondary education that will recognize institutional and sector freedom, autonomy, and aspirations on the one hand and Statewide needs and resources on the other.

PROGRAM APPROVALS

In the period from October 1, 1976, through September 30, 1977, the Commission approved a total of 15 new programs proposed by public institutions. The total of 15 was the lowest annual total approved by the Commission since inception of its program-approving authority in 1968.

The list of the approved programs in this 12-month period follows:

Degree	Major	Institution
Doctoral		
Ph.D.	Cellular and Molecular Biology and Pathobiology	Medical University of S. C.
Masters		
M.P.A.	Urban Public Affairs	College of Charleston/USC-Columbia — joint program
M.Ed.	Special Education	The Citadel and the College of Charleston, Cooperative Program
M. Music	Music History (Musicology)	USC-Columbia
M.S.	Animal and Food Industries	Clemson University[1]
M.A.	Anthropology (Conservation Archeology)	USC-Columbia[2]
Baccalaureate		
B.S.	Social Welfare	South Carolina State College
B.S.	Government and Public Service	Winthrop College
B.S.	Criminal Justice	USC-Spartanburg
Associate		
A.E.T.	Electronics Technology	Aiken Tech. Coll.
A.I.T.	Aviation Technology	Florence-Darlington Tech. Coll.[3]
A.Bus.	Transportation Management	Florence-Darlington Tech. Coll.
A.Bus.	Management	Tri-County Tech. Coll.
A.Bus.	Food Service Technology	Greenville Tech. Coll.
Other (Non-Degree)		
	Institute for Economic Development in the Pee Dee	Francis Marion College

[1] Replaces separate M.S. degree programs in Animal Science, Dairy Science, and Poultry Science.

[2] Subject to Commission review in 1983.

[3] Subject to Commission review in 1981, especially with respect to placement of graduates.

REVIEW OF GRADUATE PROGRAMS

At the request of the Commission, certain graduate programs were subjected to internal review by Clemson University and the University of South Carolina in the period 1973-75. At the conclusion of those studies, the institutions recommended that certain programs be studied further. In December, 1976, the Commission accepted institutional self-studies of three programs, all carried out in 1975-76, together with recommendations that all three be continued. These three are programs leading to masters and doctoral degrees in Linguistics at the University of South Carolina, and in Plant Pathology and in Engineering Mechanics at Clemson University. Doctoral programs to be reviewed further, all at Clemson, are: Agricultural Engineering, to be reviewed in 1978-79; and Bio-Engineering and Civil Engineering to be reviewed in 1980-81.

MEDICAL AND HEALTH EDUCATION

The Health Education Authority (HEA), an advisory body in health affairs to the Commission on Higher Education, has been operative since November, 1974. The membership consists of 19 representatives from the universities with medical schools or major educational programs in the health professions, from State health agencies, professional health associations, volunteer health organizations, and health consumers.

The Commission staff and the Health Education Authority are involved in a number of planning activities, and are making use of several administrative procedures in planning for the education and training of health professionals. These include:

1) *ad hoc* task forces reporting to the Health Education Authority. Examples are the Task Force on Optometric Education, the Task Force on Health Care Team Relationships, and the Task Force on Allied Health Sciences.
2) a Statewide Master Planning Committee on Nursing Education, advisory to the Commission and to the State Board of Nursing.
3) sponsorship of conferences, workshops, or special meetings, usually with other State agencies as appropriate, designed to identify and resolve problems, improve communication, or transmit information.
4) participation in inter-institutional and Statewide cooperative efforts, such as the Dean's Committee on Medical Doctor Education, that involve educational institutions and other State agencies. Other examples include involvement in the organization of a consortium for gerontological studies by the Social Problems Research

Institute at the University of South Carolina, and cooperation with the Division of Research and Statistical Services of the State Budget and Control Board in the administration of a grant from the Department of Health, Education and Welfare to link higher education and health manpower.

Optometric Education

A subcommittee of the Task Force on Optometric Education of the Health Education Authority completed a detailed analysis and report on "Assessment of Need for Vision Care Services and Optometric Education in South Carolina." The report has been accepted by the Commission on Higher Education and will be submitted to the General Assembly in 1978. By this action, the Commission has sustained its decision that South Carolina should participate in a tri-state regional school of optometry with Georgia and North Carolina.

The Commission staff drafted a regional financial model, "Proposal for Financing a Tri-State Regional School of Optometry." The Medical University of South Carolina has withdrawn as the potential host institution, however, and further implementation will depend upon the identification of a host institution, the availability of federal funding for construction, the procurement of funding for specific and detailed planning, the success of the plan in demonstrating feasibility and desirability of establishing a regional school, and approval by the legislatures of the three states. The Southern Regional Education Board is coordinating this interstate project.

Nursing Education

During the past year the Statewide Master Planning Committee on Nursing Education, an advisory body to the Commission on Higher Education and the State Board of Nursing, has been engaged in the development of a long-range plan for nursing education in the State. This mandate was given to the Committee by the parent agencies that collectively have responsibilities for the review, approval, and accreditation of all nursing programs in the State.

The plan will include information on need and demand in institutional settings, community health agencies, and certain geographic areas of the State, and will delineate the roles, functions, and current utilization of different types of nursing personnel. It is expected to be completed by the end of 1977 and will encompass a review of the planning methodologies of other states and/or regions of the country.

The Statewide Master Planning Committee on Nursing Education is also formulating plans for two conferences in 1978: one to focus on

clinical training in the curricula of nursing programs and the other to discuss the possible impact of national health insurance on the profession of nursing. Dr. Betty M. Johnson, Dean of the University of South Carolina College of Nursing, is Chairman of the Committee.

Nutritional Education

The staff of the Commission on Higher Education is organizing a series of conferences on Planning for the Improvement of Nutritional Education in South Carolina, designed for faculty and administrators in colleges, universities, medical schools and health education centers. The conferences are co-sponsored by the South Carolina Nutritional Council and the Area Health Education Center Program administered by the Medical University of South Carolina.

The first conference, held on June 15, 1977, was focused on the infusion of nutritional awareness and preparation in the substantive aspects of nutritional sciences in the medical school and health science curricula. Future conferences will be concerned with nutritional awareness and substantive preparation in the nutritional sciences in the curricula of Departments and Colleges of Education, in the curricula of Colleges of Arts and Sciences, and in the undergraduate and graduate preparation and training of personnel for work as technologists and professionals in the various nutritional specialties.

Medical Doctor Education

The Dean's Committee on Medical Doctor Education, established by the General Assembly, provides a format for cooperation between the Medical School of MUSC in Charleston and the new Medical School at the University of South Carolina in Columbia. The law requires that a minimum of four meetings be held annually. The Deans and Presidents of the two institutions, a representative of the Governor, a representative of the Commission on Higher Education, and the Medical District Director of the Veterans Administration serve as members of the Dean's Committee. The new Medical School at the University of South Carolina, established with financial assistance from the Veterans Administration, admitted its first class (24 students) in September, 1977.

The Dean's Committee has approved a "Proposal for a Medical Practice Plan for South Carolina: Procedures for Supplementation of the Basic Salaries of Full-Time Clinical Faculty Members Engaged in Private Practice of Health Professions as an Adjunct to the University Teaching," prepared by the health affairs staff of the Commission on Higher Education. This proposal will be considered by the Health Education Authority and will then be referred to the Commission.

Other matters of concern to the Dean's Committee include its leadership role in health planning, inter-institutional cooperation in providing training in the medical specialties, consultation with respect to student admissions, faculty recruitment, graduate training programs, and residencies.

The Health Careers Directory

The staff of the Commission on Higher Education is collaborating with representatives of the Division of Research and Statistical Services (Office of Cooperative Health Statistics) to publish the second edition of the *Health Careers Directory* by October, 1977. The Directory is a compilation of health career training programs in the State, and is designed for use as a reference manual by high school seniors and other individuals interested in pursuing health careers. Plans are to distribute copies of the Directory widely throughout the State to high schools, vocational centers, private and public colleges and universities, hospitals, and health associations, boards, organizations, and agencies.

LICENSING NON-PUBLIC INSTITUTIONS

Legislation enacted by the General Assembly in 1977 provides that the Commission on Higher Education "shall be the sole authority for licensing non-public educational institutions established (in South Carolina) or elsewhere to operate in or confer degrees in (South Carolina)." The law provides a penalty of up to $5,000 for each degree granted in willful violation and up to $15,000 against a person who violates an injunction restraining and preventing violations of the Act.

The Act provides that an institution established in South Carolina and accredited by any association or organization recognized by the Council on Postsecondary Accreditation or which is approved for teacher certification by the State Board of Education shall be considered as meeting standards for licensing. Amendments added by the General Assembly exempt from the Act any institution chartered by the Secretary of State before 1953, colleges of chiropractic, Bible institutions, and theological schools. Regulations under which the Act will be implemented are expected to be approved early in 1978.

STUDENT FINANCIAL ASSISTANCE PROGRAMS

The Commission on Higher Education has been involved for several years in four programs which have helped South Carolina residents to meet the costs of postsecondary education. Two of the programs have provided non-repayable tuition assistance to students who attend out-

of-state institutions because the academic programs they desire are not offered in the State. The other two programs, one of which was suspended in January of 1975, have provided long-term, low-interest loans which may be applied by student-borrowers to educational expenses including, but not limited to, tuition.

Contracts for Services, offering South Carolina residents the benefit of reduced tuition and fees and also the benefit of a number of reserved spaces in specific academic programs not available in South Carolina, are provided through contract with the Southern Regional Education Board. The State has such contracts in force for students in Veterinary Medicine at both Tuskegee Institute (Alabama) and at the University of Georgia. Also in place are contracts for students of Optometry at Southern College of Optometry in Memphis and at the University of Alabama in Birmingham. Through a somewhat different arrangement, South Carolina residents can obtain a reduction in tuition and fees to pursue graduate degrees in Occupational Therapy at Virginia Commonwealth University. Spaces, however, are not reserved under the contract with Virginia Commonwealth. A summary of 1976-77 contracts and awards is given below:

SUMMARY OF SREB CONTRACTS AND AWARDS
1976-77

Field	Number of Students	State Obligation
Veterinary Medicine	48	$240,000
Optometry	32	104,000
Occupational Therapy	0	0
TOTALS	80	$344,000

The State Grant Program, funded on an annual basis by the General Assembly, provides direct financial assistance to help offset additional tuition costs incurred by State residents who must attend out-of-state institutions to obtain the type of academic program they desire. The Commission on Higher Education, as authorized by the General Assembly, administers the program. During fiscal year 1975-76, the Commission awarded $98,252 in State Grants to 259 students; no awards were made in 1976-77 because no funds were appropriated for the program. For 1977-78, $81,000 was appropriated for State Grants and it is expected that awards to approximately 210 students will be made from that sum.

The Statewide Guaranteed Loan Program, terminated December 31, 1975, and replaced by the South Carolina Student Loan Corporation, is still important to the State from the standpoint of collection of loans which remain outstanding. The Commission will continue to monitor and to report progress on the repayments. As of June 30, 1977, loans outstanding numbered 3,606, representing a value of $4.8 million. There have been, since June 30, 1976, reductions of 1,233 in the number of loans outstanding and of $638.2 thousand in loan principal outstanding. The State's total program investment, in the form of reserve deposits with the guarantor (United Student Aid Funds, Inc.), amounts to $465,000.

The South Carolina Defense Scholarship Fund, administered by the Commission, plays a vital role in the participation of State-supported institutions in the National Direct Student Loan Program, the Nurse Training Loan Program, and the Health Professions Loan Program. The Federal Government established these three loan programs and provides each year 90 percent of the "new" money for long-term, low-interest loans which participating institutions make directly to their eligible students. In order to participate as a lender in one or more of the programs, an institution is required to contribute to the loan fund on its campus one-ninth of the amount provided by the Federal Government. The South Carolina Defense Scholarship Fund provides most of the required matching funds for State-supported institutions. During fiscal year 1977, the Commission distributed $187,000 to those institutions in proportion to the amount of new federal funding allocated to each institution.

The Commission is not directly involved in the Tuition Grants Program or the South Carolina Student Loan Program. Each of those programs, however, is a significant contributor to the total financial aid available to residents of the State, and a summary of State-assisted student financial aid programs would be incomplete if either program were not mentioned.

Through the Tuition Grants Program, State residents electing to attend any of 19 eligible non-public colleges within the State can receive grants if they can demonstrate financial need and if their academic records are satisfactory. During the 1976-77 academic year, 7,516 grants totaling $7.7 million were provided to eligible students. Of the total, $0.5 million were made available from federal funds through the State Student Incentive Grant Program, a federal program designed to encourage states to initiate or to expand their own grant programs.

The South Carolina Student Loan Corporation, which replaced the Statewide Guaranteed Loan Program in January of 1975, made insured

loans in the amount of $1.6 million to 1,471 students from July 1, 1976, through June 30, 1977. From the inception of the program, loans totaling $3.0 million have been made to 3,159 students.

HIGHER EDUCATION MANAGEMENT INFORMATION SYSTEM

Early in 1969, the Commission on Higher Education and the public senior colleges and universities agreed on the need for a Statewide system of uniform data identification, collection, and reporting. Responsibility for active development of the system was assigned by the presidents of the public senior institutions of higher education and the Executive Director of the Commission on Higher Education to an M.I.S. Working Committee. This Committee is composed of the vice presidents for academic and business affairs, and other key administrators, under the chairmanship of the Assistant Director for Financial Affairs of the Commission on Higher Education.

The management information system became operative in 1970. Beginning with data for the fall semester of 1969, the colleges and universities and the Commission began to receive and use comparable reports on students, faculty, and other essentials. By 1972 the first stage of the management information system was virtually complete, including data on revenues and expenditures, space analysis, and analyses of non-teaching staff and student fees.

Appendices E through S contain some summaries and analyses of data contained in recent reports by the public colleges and universities to the Commission on Higher Education. Coverage includes student characteristics and full-time equivalent (FTE) enrollments by level, FTE teaching faculty by rank, semester credit hour production per FTE teaching faculty member, semester hour and contact hour comparisons, student/faculty ratios, average weekly teaching hours, average class sizes, average faculty salaries by rank, revenues by source, expenditures by function, student fees, etc. Such information could not have been obtained on a reliable basis before the existence of a uniform information system.

The second stage of higher education management information system development requires computerization. The following three-phase joint computerization project of the Commission and the colleges and universities began in February, 1974:

1. *Data Element Dictionary.* A standard set of data elements and definitions for use by all public institutions was completed in July, 1974. This includes all data elements that relate to students, courses, faculty/staff, finance, and facilities.

2. *Institutional Reporting System.* Computer programs that will assist an institution in the preparation of its CHE and HEGIS reports were completed in mid-1976 and have been tested with the University of South Carolina's data base. These programs are available for all other institutions to use after they complete their data bases. The Costing and Data Management Systems computer software developed by the National Center for Higher Education Management Systems has been implemented on the computers at Clemson and the University of South Carolina. Both of these institutions have tested the software with 1975-76 data and are now in the process of computing program costs for 1976-77. Winthrop College and three technical institutions (Beaufort, Midlands and Piedmont) are also making plans to compute program costs for 1976-77.
3. *State-Level Reporting Systems.* Computer programming to build and maintain the Commission's state-level information base (SLIB) is currently under way. Testing of the data base was completed in June, 1977. 1977-78 data are being collected for analysis later.

COMPUTER ADVISORY COMMITTEE

The Computer Advisory Committee, initiated and sponsored by the Commission on Higher Education, has been in existence since 1969. The Committee is comprised primarily of the computer center directors of the public senior colleges and universities, chaired by the Assistant Director for Financial Affairs. Its adopted charter follows:

> The Computer Advisory Committee is organized within the Commission on Higher Education to foster the growth of computer usage in higher education, both public and private, in South Carolina. The Committee is a coordinating, rather than controlling, agency for computer usage, functioning primarily as a body to improve communications among the State's universities and colleges. In particular, it is to (1) provide a forum for regular discussion of mutual problems, (2) communicate the needs of institutions to the Commission and advise the Commission on all computer-related matters, (3) review institutional plans for acquisition of computer hardware and software, and (4) encourage mutual cooperation among institutions in such areas as development of compatible programs and data formats, coordination of long-range plans, and study of joint computer facilities and systems.

The Computer Advisory Committee continues to hold regular meetings, usually at the Commission's Columbia office, but sometimes at one

of the institutions so as to observe computer developments on the site. It regularly invites to its meetings the Director of the State Division of Computer Systems Management so as to maximize collaboration and minimize duplication of effort. The Committee also regularly invites a representative of South Carolina private colleges and a representative of the State Board for Technical and Comprehensive Education to provide liaison with other sectors of postsecondary education.

Developments in computer hardware and software during the past eight years have been both rapid and extensive. Computing improvements at South Carolina public colleges and universities during that period have been equally noteworthy, due largely to the Computer Advisory Committee. From a variety of largely incompatible and often inadequate computer centers, each operating independently, there has evolved since 1969 a first-class Statewide higher education computer network. Now the three universities have large, modern, compatible computers which also serve the colleges through on-line terminals. Each institution ultimately decided in its own best interests to abandon its independent approach to computing and to join in a cooperative enterprise.

Dollar savings through cooperative computerization are difficult to measure. The use of computers in higher education is very expensive. Nationwide studies have shown that colleges and universities, on the average, spend about two percent of their income on data processing. For South Carolina public senior institutions, this means a total of about $6 million annually. It is clear that through the Computer Advisory Committee, cooperation among the institutions in solving computing problems has resulted in less cost than would otherwise have been the case.

STATE APPROPRIATIONS FOR COLLEGES AND UNIVERSITIES

The Commission on Higher Education received and reviewed 1977-78 appropriation requests aggregating $176.3 million from nine senior colleges and universities, including the Medical University's hospital, clinics, and Statewide public service activities, and from the three four-year and six two-year regional campuses of the University of South Carolina. In line with the 1976 General Assembly's mandate, the Commission's review placed primary emphasis on appropriation requests as computed by formula. An appropriation formula has been under joint development by the colleges and universities and the Commission since 1971. Following extensive reviews, the Commission recommended to the State Budget and Control Board and to the Legislature appropria-

tions totaling $163.8 million. The 1977 General Assembly ultimately appropriated a total of $155.8 million; details are contained in the table below.

The 1977-78 General Appropriations Act states that the Legislature will utilize a formula approach in subsequent years. The formula to be used by the Commission for 1978-79 was adopted by the Commission on June 2, 1977, and is included in this Annual Report as Appendix D.

1977-78 APPROPRIATIONS FOR CURRENT OPERATIONS OF SOUTH CAROLINA PUBLIC SENIOR COLLEGES AND UNIVERSITIES (Excluding Fringe Benefits)

	Requested by Institutions	Recommended by CHE	Appropriation Act
Winthrop	$ 6,591,871**	$ 6,591,817**	$ 6,509,417**
The Citadel	6,309,807	6,035,179	5,917,200
S. C. State	7,848,611	7,517,111	7,500,184
College of Charleston	8,964,457	8,553,184	7,519,212*
Francis Marion	4,342,735	4,339,229	3,738,984*
Lander	3,049,522*	3,049,522*	2,731,130*
USC-Aiken	2,119,815	2,006,297	1,985,519
USC-Coastal	2,000,006	2,006,000	1,986,535
USC-Spartanburg	2,978,585	2,964,710	2,102,909
Two-Year Regional Campuses	3,045,968	3,045,968	2,873,917
USC-Main Campus (Excl. Med. Sch.)	49,017,457	47,186,775	44,034,038
Clemson (Education and General)	26,420,148	26,251,303	25,514,977
All Except Medical University and USC Medical School	$122,695,081	$119,436,714	$112,123,043
Medical University	50,341,534	42,666,902	42,067,731
USC Medical School	3,253,721	1,770,308	1,582,446
TOTAL	$176,290,006	$163,793,968	$155,773,220

* Plus tuition retention.
** Plus $121,000 dormitory deficit

In addition to the above amounts, the 1977-78 General Appropriation Act contains appropriations to the above institutions of $19,330,847 for Employee Fringe Benefits.

CAPITAL IMPROVEMENTS

The General Assembly provided a relatively modest $3,647,900 for capital improvements at the public colleges and universities with the Medical University receiving $2,200,000 of the total. No new construc-

25

tion was funded although planning funds were provided for five new projects.

The provisions of the State Institution Bonds Act were extended to the institutions under the State Board for Technical and Comprehensive Education. This Act provides for the raising of funds for capital improvements through the issuance of bonds backed by the full faith and credit of the State and financed by charges to students which are designated as "tuition." Among other requirements, the amount actually collected as tuition for the past twelve months multiplied by the number of years for which debt service will be paid must equal at least 150% of all Institutional Bond indebtedness and the trustees must agree to increase tuition in the future if necessary to meet debt service requirements.

SUMMARY OF COMMISSION EXPENDITURES FOR 1976-77

The expenditures of the Commission are listed under two headings: Administration (operating expenses of the Commission) and Service Programs (coordinated by the Commission). Attention is called to the fact that 58 percent of total expenditures directly supported educational activities other than those of the Commission. None of these flow-through funds were expended on operating expenses.

I.	Administration (Operating Expenses)	
	1. Personnel Services (Salaries, etc.)	$ 382,489
	2. Other Operating Expenses	168,622
	TOTAL ADMINISTRATION	$ 551,111
II.	Service Programs	
	1. S. C. Defense Scholarship Fund	$ 187,000
	2. Southern Regional Education Board Grants to Students	344,050
	3. Southern Regional Education Board Fees & Assessments	64,000
	4. Project Grants, Title I, Federal HEA 1965	175,118
	TOTAL SERVICE PROGRAMS	$ 770,168
	TOTAL — Commission on Higher Education	$1,321,279
III.	Source of Funds	
	1. State Appropriation	$1,076,088
	2. Federal Funds	245,191
		$1,321,279

[1] Includes associate degree students in technical education institutions.

APPENDIX D

SOUTH CAROLINA COMMISSION ON HIGHER EDUCATION
1978-79 APPROPRIATION FORMULA

The Appropriation Formula provides for *equitable sharing* of state taxpayer support for South Carolina's public colleges and universities. Realistic *lump-sum* appropriations are computed *impartially* by using actual enrollments, proven student/faculty ratios, *uniform* salary assumptions, and justifiable *average* percentages to cover the agreed functions of the institutions.

---

1. Estimate the number of student credit hours to be produced, by level of instruction and academic area, during the fall 1978 semester. Such estimate may include half credit for contact hours in physical education and remedial courses unless credit hours toward a degree are awarded for such courses.

   (See CHE Report 14)

2. Divide undergraduate credit hours by 15
   professional (law) credit hours by 15
   master's level credit hours by 11*
   and doctoral credit hours by 9
   to determine the number of FTE (Full Time Equivalent) students to be taught.

   (See CHE Report 3)

3. To find the number of FTE *teaching* faculty positions required, divide the number of FTE students at each level and in each academic area by an appropriate student/faculty ratio (see attachment).

4. Compute the cost of teaching faculty salaries as follows:
   (a) Of the total number of FTE teaching faculty (other than ROTC) positions required, determine the proportion to be filled by teaching assistants. (Use the proportion shown on fall 1976 CHE Report 9, unless justification for a different proportion is presented.) Multiply the number of FTE teaching assistants required by $6,633 (USC's 1976-77 average 9 months FTE teaching assistant salary) plus improvements of 5% for 1977-78 and 2.5% for 1978-79.

   (b) Multiply the remaining number of FTE teaching faculty (other than ROTC) positions required
   by $17,808 (Clemson's 1976-77 average 9 months salary for all main campus teaching faculty except student assistants) plus improvements of 6.7% and 2.5% for main campus operations of the two universities, or
   by $16,014 (Winthrop's 1976-77 average 9 months teaching salary) plus improvements of 6.7% and 2.5% for colleges and four-year regional campuses, or
   by $13,304 (USC's General Studies' 1976-77 average 9 months teaching salary) plus improvements of 6.7% and 2.5% for two-year regional campuses.

   (See CHE Report 10)

   (c) ROTC faculty salaries may be computed at Step 4 (b) rates for purposes of calculating Steps 5, 6 and 8, but may not be included in Step 4.

5. For the two universities add 40%, for the colleges and four-year regional campuses add 35% (40% for graduate instruction), and for two-year regional campuses add 30% of total teaching salary requirements to provide for instructional costs other than teaching salaries (i.e., "teaching faculty support") such as non-teaching portions of deans' and department heads' salaries, secretaries and clerks, non-teaching graduate assistants, supplies, equipment, travel, telephone, etc. *Teaching faculty salaries plus teaching faculty support equal total Instructional costs.*

44

6. Add 10% of total Instructional costs (as determined in Step 5) to cover Libraries, including acquisitions and operations.

7 (a) Add the average of three years' (1974-75, 1975-76, and 1976-77) actual expenditures for Operation and Maintenance of Plant (other than certain utilities) plus 6% per year. If during 1977-78 or 1978-79 the gross square footage of educational and general buildings increases at a faster rate than FTE student enrollments, add such incremental percentage to that year's allowance for general cost increases. Total allowable expenditures for Operation and Maintenance of Plant (other than certain utilities) may not exceed 31% of total Instructional costs.

(b) Add the actual 1976-77 expenditures for certain utilities (fuel oil, electricity, coal, and gas for heating, cooling and lighting) plus 8% per year (20% for gas). If during 1977-78 or 1978-79 the gross square footage of educational and general buildings increases at a faster rate than FTE student enrollments, add such incremental percentage to that year's 8% or 20% allowance for general cost increases.

8. Add 26% of total Instructional costs to cover General Administration, Student Services, General Institutional Expense, Organized Activities Related to Educational Departments, and Extension and Public Service.

9. Add the amounts calculated in Steps 4, 5, 6, 7 and 8 to determine the costs of basic Educational and General operations of each university main campus, each college or four-year regional campus, and the two-year regional campus system.

10. Compute the required student fee income deduction for Educational and General purposes at $300 for each FTE university or regional campus student and $200 for each FTE college student, the amount per FTE to be doubled for the predicted percentage of out-of-state students. To this add the estimated revenue from sales and services (including application, laboratory, auto registration, and other service fees) and any anticipated income from federal or local governments to be received in support of 1978-79 Educational and General operations.

11. Subtract the amount computed under Step 10 from the corresponding amount computed under Step 9. This determines the lump-sum state appropriation requested for basic Educational and General operations, subject to adjustment for actual fall 1978 enrollments.

12. Special funding over and above that provided under Step 11 may be requested for continuing or one-time non-capital expenditures such as:

(a) *Continuing:* Justifiable incremental costs of continuing special situations in which the institution is not free to discontinue or curtail costly services or those required by the State (e.g., The Citadel's necessary extra costs resulting from being a military college; S. C. State's necessary costs in excess of student fees and other income for operating the Felton Laboratory School; and S. C. State's necessary costs of special remedial counseling and guidance).

(b) *One-time:* Justifiable net (i.e., after deducting related revenues), major one-time costs such as the previously agreed extra costs of new programs approved by the Commission on Higher Education, special startup costs of new colleges if not covered by tuition retention, and amounts (in excess of those reasonably covered by Step 6, or by special startup costs, or by tuition retention) needed to bring library collections up to minimum accreditation standards. Note that equipment for new buildings is explicitly included in each permanent improvement project approved by the Budget and Control Board; redress for deficiencies should be sought through the same channels.

13. Special funding may also be requested for Separately Budgeted Research, including operation of special bureaus and institutes and the universities' general research

supplement of $250 per FTE graduate student. These requests should be listed individually and justified fully. New programs require approval of the Commission. (Expenditures for Sponsored Research and Other Sponsored Programs may not be included, since these are required to be self-supporting.)

NOTE: * The divisor for determining FTE master's level students will increase to 12 next year.

Adopted June 2, 1977
